### SILVER SURFING: How to Ride the Silver Wave to Record Profits

Congratulations! You're well on your way to discovering how to make **over 50%** annual profits on silver's coming boom.

As a matter of fact, this report is going to show you how to make these kinds of gains *no matter which way silver goes* — up, down or sideways — with a special low-risk, high-return strategy!

But first, I need to ask you a serious question:

#### How Safe is Your Wealth?

The reason I ask is because we both know it's not enough to grow your wealth — knowing how to protect it is just as important.

After all, what's the point of making tremendous profits if they're only going to be eroded through punitive taxes and rampant inflation?

The fact is, both are still serious threats — especially when you consider Barack Obama's public desire to *double* the capital gains tax...and John McCain wondering why interest rates can't be 0%! (I only wish I was making this up.)

Fortunately, there is a refuge from all of this lunacy.

It's called the **New Orleans Investment Conference**, and it's going to be held Nov. 13-17 in one of America's most historic cities.

Now in its 34th year, **Money Magazine** calls the **New Orleans Investment Conference** "The greatest investment show on earth."

#### Silver is Only the Beginning

Imagine making the kind of profits from the knowledge contained in **Silver Surfing** — not just on silver but across many other sectors like currencies, alternative energy, hedge funds, bonds and more!

And you'll also learn how to **protect** these profits from Washington insiders like Steve Forbes, Fred Thompson, James Carville and Stephen Moore.
